

Product Limited Warranty Terms

Tianjin Huanou International Silicon Material Co.,Ltd (HuanOu International) provides following limited product warranty and limited power warranty (limited warranty) for solar module product (solar module) according to the following stated conditions, exceptions and limitations.

1. Limited product warranty----10-Year Repair, Replacement

HuanOu International warrants its Modules to be free from defect in workmanship, as per the Mechanical and Electrical Characteristics of the Module's Datasheet, under HuanOu International normal application, installation, use and service conditions, using and service from the day customer bought the solar modules or which is exactly one year since the product go out (the earlier one is effective, hereinafter 'warranty day') to the time ten years after that.

During these ten years, if solar modules were not conforming to the requirement of this limited product warranty, HuanOu International will, at it option, either repair or replace the Modules. The repair or replacement shall be the sole and exclusive remedy provided under the clause "limited product Warranty" and shall not extend Period of warranty set forth herein.

2. Limited power warranty

A. Linear warranty of 25 years

HuanOu International promises further that, during 25 years

since the warranty day, the power attenuation of the first year will not higher than 97.5% of the stated output power on the original label of the modules, after that the power attenuation each year should not higher than 0.6% of the stated output power on the original label of the modules. And if such power attenuation that lower than expected power value is caused by material or technology under the condition of normal application, using and service, HuanOu International will give following compensation for such power attenuation accordingly: 1) maintaining or replacing the solar modules which have defects without any collection of charges; 2) Providing additional solar modules of corresponding quantity for customers to compensate for such power attenuation to make the output power surpass the corresponding expected stated power if permitted; 3) Refunding the difference between the practical output power and the expected stated power of the year according to the current market price at the request of customers.

B. In order to confirm the power output of the solar module, the measurement should be done under the standardized experiment condition of $1000\text{w}/\text{M}^2$, battery temperature of $25\text{ }^\circ\text{C}$ and AM1.5 spectrum. The measurement should be according to IEC60904 and working out the power value taking the uncertainty

between systems into consideration according to EN50380.
